PRAKASH KUMAR

Senior Software Engineer |Laravel|Microservices|kafka|Wordpress|REST APIs|AWS

Noida, India • +91-7070555845 • prakashsingh001122@gmail.com • 6 Years 6 Months Experience

PROFESSIONAL SUMMARY

Results-driven Full-Stack PHP Developer with over 6 years of experience designing, building, and deploying scalable, secure web applications using Laravel, Yii2, CodeIgniter, and WordPress. Skilled in building RESTful and JWT-secured APIs, implementing robust authentication/authorization layers, and applying SOLID principles with loosely coupled, modular architecture to keep large codebases maintainable. Strong hands-on experience with MySQL/PostgreSQL, background job queues, and modern JavaScript frameworks (Angular, React.js). Proven ability to mentor engineers, enforce code-quality standards, and deliver production-grade features within Agile/Scrum teams.

TECHNICAL SKILLS

Languages & Core PHP: PHP 7/8, Object-Oriented PHP (Late Static Binding, Traits, Interfaces, Abstract Classes), SOLID Principles, Common Design Patterns (Singleton, Factory, Repository)

Frameworks & CMS: Laravel, Yii2, CodeIgniter, WordPress (Multisite Architecture, Custom Plugin & Theme Development)

Frontend Development: JavaScript (ES6+), jQuery, Angular, React.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Databases: MySQL, PostgreSQL, Relational Database Design, Query & Index Optimization

API, Authentication & Security: RESTful API Design & Integration, JWT (JSON Web Tokens), OAuth 2.0, Session & Token-based Authentication, Role-based Authorization (RBAC), Laravel Sanctum/Passport

Architecture & Design: MVC Architecture, Loosely Coupled & Modular Design, Dependency Injection, Microservices Fundamentals

Background Processing & Automation: Queues & Jobs (Laravel Queue), Task Scheduling / Cron Jobs, Event-driven Workflows

Tools, DevOps & Practices: Git/GitHub/GitLab, Composer, NPM, Docker Fundamentals, CI/CD Pipelines, Postman, Agile/Scrum, PHPUnit & Unit Testing

WORK EXPERIENCE

SD Analyst—ValueLabs *Jan 2026 – Present*

- Develop and maintain custom **WordPress plugins and enterprise web solutions** for large-scale environments.
- Design modular and loosely coupled PHP components using **OOP, SOLID principles, dependency injection, and reusable design patterns**.
- Develop and integrate secure REST APIs and third-party services.
- Analyze backend performance issues and optimize PHP code, database queries, and application workflows.
- Investigate application issues across development, QA, and production environments and coordinate fixes with relevant teams.
- Use Git-based development workflows and CI/CD processes for controlled application delivery.

Senior Software Engineer — Tech Mahindra *Dec 2024 – Dec 2025*

- Developed custom WordPress plugins and contributed to large-scale enterprise solutions and secure API integrations.
- Optimized backend performance and implemented modular, loosely coupled code architecture for improved maintainability and scalability.
- Collaborated within Agile/Scrum teams to deliver features on schedule, upholding code quality through peer reviews and testing.

Senior Software Engineer — Dayal Info Systems *May 2024 – Nov 2024*

- Developed REST APIs using the Yii framework with token-based authentication, improving performance and scalability of CMS-based applications.
- Mentored junior developers and conducted code reviews to ensure quality and consistency across the codebase.

Software Engineer — Innova Solutions ACS *Nov 2021 – Mar 2024*

- Delivered custom WordPress Multisite plugins and dashboards to support large network deployments.
- Integrated AG Grid, ReactJS, and Angular to build dynamic, data-driven admin tools.
- Managed server-side optimization to improve performance across deployments.

PROJECTS

YoungIndians *12 Months*

- Developed a Laravel web application enabling admins to manage pages, categories, and gallery items through backend interfaces.
- Implemented MySQL-driven data models and jQuery-powered front-end interactions to maintain site content.

HGComply *12 Months*

- Built an internal system for managing worker details, assignments, and time-entry modules with approval workflows using PostgreSQL and PHP.

RateCalculator *12 Months*

- Developed a margin calculation engine using Spring Boot and Angular 13 for US and Indian workers, with region-based calculations and approval flow.

Actual Tuition *12 Months*

- Built an online tuition platform supporting course creation, student enrollment, PayPal integration, and Zoom integration for virtual sessions using CodeIgniter and React.js.

FriendsForever *12 Months*

- Developed an e-commerce website in Laravel for pet products with Stripe payment integration and automated email notifications.

EDUCATION

Master of Computer Applications (MCA) *2021*
Indira Gandhi National Open University (IGNOU), Delhi • 61%

Bachelor of Computer Applications (BCA) *2019*
Indira Gandhi National Open University (IGNOU), Delhi • 62%

12th (Higher Secondary) *2014*
Bihar Board, English Medium • 50%

10th (Secondary) *2011*
CBSE • 67%

EXTRA-CURRICULAR ACTIVITIES

Community Mentoring
Mentored junior developers and conducted code reviews and knowledge-sharing sessions within teams to improve coding standards and onboarding.

ACHIEVEMENTS

Key Contributions
Delivered multiple production-grade modules and custom WordPress Multisite plugins that improved administrative workflows and scalability.

ADDITIONAL INFORMATION

Hobbies: Technical Blogging, Open Source Contribution

Languages: English, Hindi
