PRAKASH KUMAR

Senior Full-Stack Software Engineer |Laravel|React.js|Microservices|Kafka|WordPress|REST APIs|AWS

Noida, India • +91-7070555845 • prakashsingh001122@gmail.com • 6 Years 6 Months Experience
Portfolio: pkkumars.github.io/PrakashKumar

PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with 6+ years of experience designing, building, and deploying scalable, secure web applications. Backend expertise in PHP 7/8 with Laravel, Yii2, CodeIgniter, and WordPress (Multisite, custom themes, plugins, and page templates); frontend expertise in HTML5, CSS3, Bootstrap, JavaScript (ES6+), and React.js, with working knowledge of Angular. Skilled in RESTful and JWT-secured APIs, event-driven architecture with Kafka, Laravel queues, and SOLID, loosely coupled design. Delivered a WordPress Multisite migration from PHP 7 to PHP 8 for Mayo Clinic. Experienced across the full SDLC in Agile/Scrum teams: mentoring engineers, reviewing code, breaking down tasks, and enforcing quality standards.

TECHNICAL SKILLS

Languages & Core PHP: PHP 7/8, Object-Oriented PHP (Late Static Binding, Traits, Interfaces, Abstract Classes), SOLID Principles, Common Design Patterns (Singleton, Factory, Repository)

Frameworks & CMS: Laravel, Yii2, CodeIgniter, WordPress (Multisite Architecture, Custom Plugin, Theme & Template Development, PHP 7 to 8 Migration)

Frontend Development: HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript (ES6+), React.js, jQuery, Responsive UI Development; working knowledge of Angular

Databases: MySQL, PostgreSQL, Relational Database Design, Query & Index Optimization

API, Authentication & Security: RESTful API Design & Integration, JWT (JSON Web Tokens), OAuth 2.0, Session & Token-based Authentication, Role-based Authorization (RBAC), Laravel Sanctum/Passport

Architecture & Design: MVC Architecture, Event-driven Architecture (Apache Kafka), Loosely Coupled & Modular Design, Dependency Injection, Microservices Fundamentals

Background Processing & Automation: Queues & Jobs (Laravel Queue), Task Scheduling / Cron Jobs, Event-driven Workflows

Tools, DevOps & Practices: Git/GitHub/GitLab, Composer, NPM, Docker Fundamentals, CI/CD Pipelines, Postman, SDLC (Agile/Scrum), PHPUnit & Unit Testing

Team Practices: Mentoring Junior Developers, Code Reviews, Task Breakdown & Sprint Planning, Knowledge Sharing, Technical Documentation

WORK EXPERIENCE

SD Analyst—ValueLabs *Jan 2026 – Present*

- Develop and maintain custom **WordPress plugins and enterprise web solutions** for large-scale environments.
- Design modular and loosely coupled PHP components using **OOP, SOLID principles, dependency injection, and reusable design patterns**.
- Develop and integrate secure REST APIs and third-party services.
- Analyze backend performance issues and optimize PHP code, database queries, and application workflows.
- Investigate application issues across development, QA, and production environments and coordinate fixes with relevant teams.
- Use Git-based development workflows and CI/CD processes for controlled application delivery.

Senior Software Engineer — Tech Mahindra *Dec 2024 – Dec 2025*

- Developed custom WordPress plugins and contributed to large-scale enterprise solutions and secure API integrations.
- Optimized backend performance and implemented modular, loosely coupled code architecture for improved maintainability and scalability.

- Collaborated within Agile/Scrum teams to deliver features on schedule, upholding code quality through peer reviews and testing.

Senior Software Engineer — Dayal Info Systems *May 2024 – Nov 2024*

- Developed REST APIs using the Yii framework with token-based authentication, improving performance and scalability of CMS-based applications.
- Mentored junior developers and conducted code reviews to ensure quality and consistency across the codebase.

Software Engineer — Innova Solutions ACS *Nov 2021 – Mar 2024*

- Delivered custom WordPress Multisite plugins and dashboards to support large network deployments.
- Integrated AG Grid, ReactJS, and Angular to build dynamic, data-driven admin tools.
- Built responsive user interfaces with HTML5, CSS3, Bootstrap, and React.js.
- Managed server-side optimization to improve performance across deployments.

PROJECTS

Mayo Clinic — WordPress Multisite Migration (PHP 7 to PHP 8)

- Migrated a large WordPress Multisite network from PHP 7 to PHP 8, auditing custom code and plugins for removed functions, deprecations, and stricter type handling.
- Developed and refactored custom themes, plugins, and page templates to run reliably across the multisite network.
- Tested across development, QA, and production environments and coordinated fixes with QA and infrastructure teams for a controlled release.

Event-Driven Services (Laravel + Kafka)

- Designed an event-driven architecture where Laravel services publish domain events to Kafka topics and independent consumers handle notifications, data sync, and auditing asynchronously.
- Implemented retry and failure handling so downstream issues do not block core workflows, and documented event contracts for the team.

Background Processing (Laravel Queues)

- Moved emails, exports, and third-party sync work into queued jobs with retries and failed-job handling to keep web requests fast.
- Scheduled recurring tasks through cron and the Laravel scheduler, and used events and listeners to decouple business logic.

YoungIndians *12 Months*

- Developed a Laravel web application enabling admins to manage pages, categories, and gallery items through backend interfaces.
- Implemented MySQL-driven data models and jQuery-powered front-end interactions to maintain site content.

HGComply *12 Months*

- Built an internal system for managing worker details, assignments, and time-entry modules with approval workflows using PostgreSQL and PHP.

RateCalculator *12 Months*

- Developed a margin calculation engine using Spring Boot and Angular 13 for US and Indian workers, with region-based calculations and approval flow.

Actual Tuition *12 Months*

- Built an online tuition platform supporting course creation, student enrollment, PayPal integration, and Zoom integration for virtual sessions using CodeIgniter and React.js.

FriendsForever *12 Months*

- Developed an e-commerce website in Laravel for pet products with Stripe payment integration and automated email notifications.

EDUCATION

Master of Computer Applications (MCA) *2021*
Indira Gandhi National Open University (IGNOU), Delhi • 61%

Bachelor of Computer Applications (BCA) *2019*
Indira Gandhi National Open University (IGNOU), Delhi • 62%

12th (Higher Secondary) *2014*
Bihar Board, English Medium • 50%

10th (Secondary) *2011*
CBSE • 67%

LEADERSHIP & MENTORING

Mentoring, Code Reviews & Team Support

- Mentored junior developers through pairing, onboarding, and knowledge-sharing sessions to improve coding standards.
- Reviewed pull requests for readability, SOLID adherence, security, query performance, and test coverage with clear, actionable feedback.
- Broke features into sprint-sized tasks with clear acceptance criteria and supported teammates with estimation and blockers.

ACHIEVEMENTS

Key Contributions

Delivered multiple production-grade modules and custom WordPress Multisite plugins that improved administrative workflows and scalability, including the PHP 7 to PHP 8 migration of a Mayo Clinic WordPress Multisite platform and event-driven services built on Kafka and Laravel queues.
